

Product Change Notification

smartPanels | Discontinuation of DNV certificate

DNV Certification Status of Yaskawa smartPanels

In 2025, all smartPanels obtained the DNV certification, a common requirement for use of equipment in maritime applications. However, as the certification did not yield the expected benefits, and in order to avoid the ongoing costs and associated effort of maintaining it, the certification will be phased out by July 2026. Please note that this change affects only the DNV certification status. The respective Model Code, version, appearance, functionality, quality, performance, and availability of each product affected remain the same.

The smartPanel products affected by this change are listed below.

Model Code	SAP No.	Material Description
H41-71A41-0	10099383	smartPanel TP304-SM Display: 4.3" Movicon 11.6 Runtime
H71-71A41-0	10099384	smartPanel TP307-SM Display: 7" Movicon 11.6 Runtime
HA1-71A41-0	10099382	smartPanel TP310-SM Display: 10.1" Movicon 11.6 Runtime
H41-A1A41-0	10115473	smartPanel TP404-SM Display: 4.3" HMI Runtime 4.5.2
H71-A1A41-0	10115474	smartPanel TP407-SM Display: 7" HMI Runtime 4.5.2
HA1-A1A41-0	10115475	smartPanel TP410-SM Display: 10.1" HMI Runtime 4.5.2

As a result, YASKAWA is no longer permitted to advertise the DNV certification of the smartPanels. Please ensure that the DNV certification for smartPanels is no longer advertised and remove any mentions of it from your sales or marketing material, website, trade fair demos, etc.
