

MEDIA PACKAGES

suitable for all applications

YASKAWA offers the complete robot portfolio for every application – including additional media packages.

If required by the customer, these are fitted directly on the robot prior to delivery.

All media lines are terminated as standard with pluggable connections, with air hoses are suitable for compressed air. Each of the upper ends are open and delivered with 1 m length of cable or hose.

The robot typical intermediate flanges are provided as an option. If additional media are required, these can be custom configured in accordance with specific requirements.

Some media packages are predefined and can thus be ordered directly without the need for additional clarification. Furthermore, replacement packages are available for all existing packages.

KEY BENEFITS

- Available for all applications
- Directly installed on the robot
- All media lines on bottom terminated with pluggable connections
- Predefined and variable media combinations
- Wiring connectors included
- Replacement packages

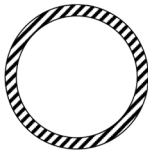

MEDIA PACKAGES
