Smart. Flexible. Intuitive. – smartPanels & HMI Designer
now Available

visualization with
HMI Designer

10.1"

7"

4.3"

smartPanels

The smart choice for ease of use, performance and connectivity. Equipped with the HMI Designer, there are no limits for the user when it comes to tags, screens, recipes, alarms and more.

FEATURES

- Durable and robust - IP66 protection class (front side) for industrial use
- Linux operating system, HMI Runtime programmable with HMI Designer for demanding applications

- For powerful and still cost-effective HMI applications
- OPC UA and many more (almost 200) integrated communication protocols
- Screen diagonal: 4.3 inch, 7 inch, 10 inch

For more technical details, please refer to our website!

Models and specifications

Model Code	YEU SAP No.	Details
H41-A1A41-0	10115473	smartPanel TP404-SM Display: 4.3" Visualization system: HMI Runtime 4.5.2 - 10.000 tags
H71-A1A41-0	10115474	smartPanel TP407-SM Display: 7" Visualization system: HMI Runtime 4.5.2 - 10.000 tags
HA1-A1A41-0	10115475	smartPanel TP410-SM Display: 10.1" Visualization system: HMI Runtime 4.5.2 - 10.000 tags

HMI Designer

The easy-to-learn and user friendly HMI Designer software covers the areas of connectivity, device management, process management and data visualization among others.

HMI Designer is YASKAWA's powerful software suite for creating and running intuitive Human-Machine Interfaces across multiple platforms. With its flexible editor framework, you can design customized HMI applications for smartPanels, iCube with WebHMI App, and PC-based systems.

Whether you need a complete development environment or a dedicated runtime for PC-based applications, HMI Designer delivers efficiency, scalability, and seamless integration for modern automation projects.

HMI Designer is an HMI development environment that is included with iCube Engineer at no additional cost.

HMI Designer is available as a stand-alone version, which can also work easily with other third-party tools.
